

Guide to modify Empire Earth in Professional Way

Starting With

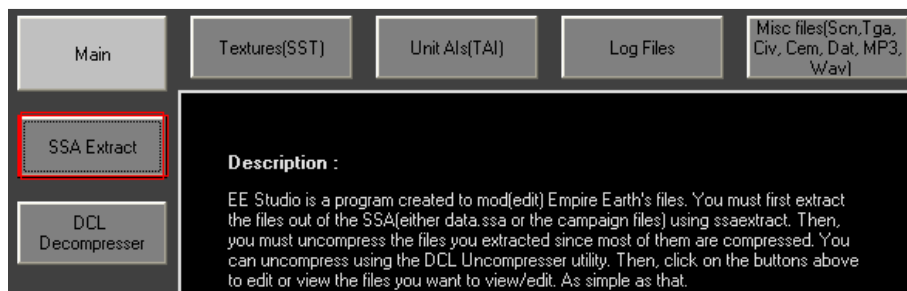

You need 4 softwares For now...

- 1) EE Studio: Using this to extract Data.ssa
Download it <http://ee.heavengames.com/downloads/showfile.php?fileid=1004>
- 2) Wolfie's EE MultiDecompressor to decrypt .dat files after extraction
Download it <http://www.mediafire.com/?6rr7eedbnpdd1hm>
- 3) A hex editor Such as Hex Workshop which is going to be Used Here: This allows you to edit the .dat files directly.
Download it <http://www.mediafire.com/?wnejxdtuomd>
- 4) Resource Hacker :Program used to edit language and add Language Ids

Download it http://www.angusj.com/resourcehacker/reshack_setup.exe

Procedure:

- 1- Open EE Studio After installing it, It would be in desktop
Now first we want the game files so we need to extract them
Open EE Studio ..Click in SSA Extract as shown in figure below.

This gonna be shown (Black screen)

Write where your Empire earth data.ssa Located...In my Case
It is

C:/Sierra/Empire Earth/Data/data.ssa

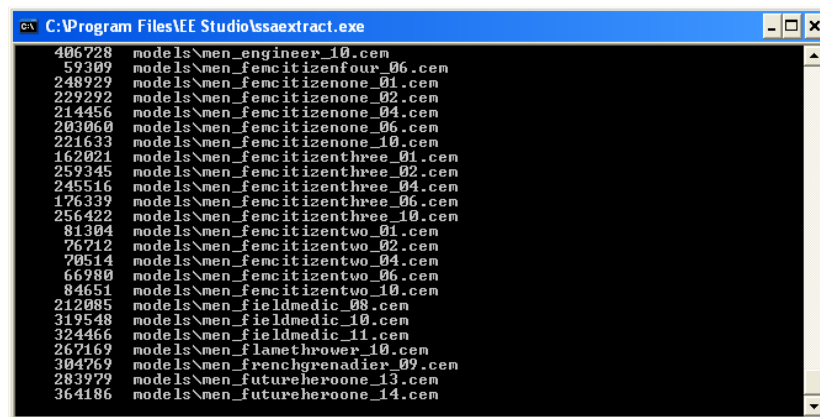

Press Enter key

Now choose your output Directory .Lets say

C:/EE Extract/

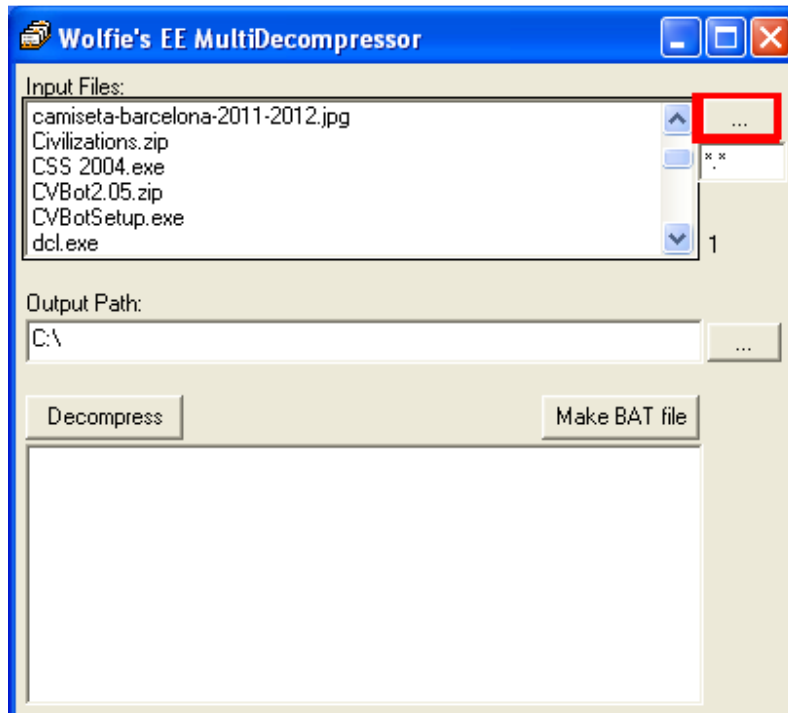

Now Press Enter key again

Extraction process started as shown in figure below. Wait it until finishing

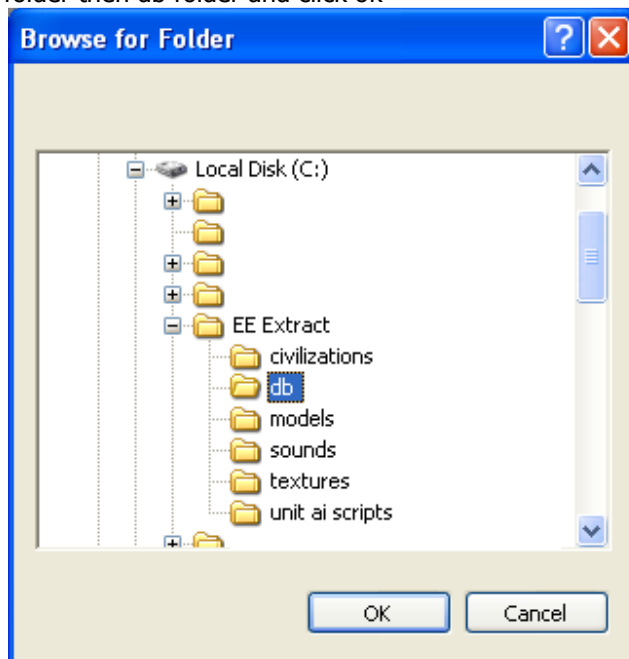

```
C:\Program Files\EE Studio\ssaextract.exe
406728 models\men_engineer_10.cem
59309 models\men_fencitizenfour_06.cem
248929 models\men_fencitizenone_01.cem
229292 models\men_fencitizenone_02.cem
214456 models\men_fencitizenone_04.cem
203060 models\men_fencitizenone_06.cem
221633 models\men_fencitizenone_10.cem
162021 models\men_fencitizenthree_01.cem
259345 models\men_fencitizenthree_02.cem
245516 models\men_fencitizenthree_04.cem
176339 models\men_fencitizenthree_06.cem
256422 models\men_fencitizenthree_10.cem
81304 models\men_fencitizentwo_01.cem
76712 models\men_fencitizentwo_02.cem
70514 models\men_fencitizentwo_04.cem
66980 models\men_fencitizentwo_06.cem
84651 models\men_fencitizentwo_10.cem
212085 models\men_fieldmedic_08.cem
319548 models\men_fieldmedic_10.cem
324466 models\men_fieldmedic_11.cem
267169 models\men_flamethrower_10.cem
304769 models\men_frenchgrenadier_09.cem
283979 models\men_futureheroone_13.cem
364186 models\men_futureheroone_14.cem
```

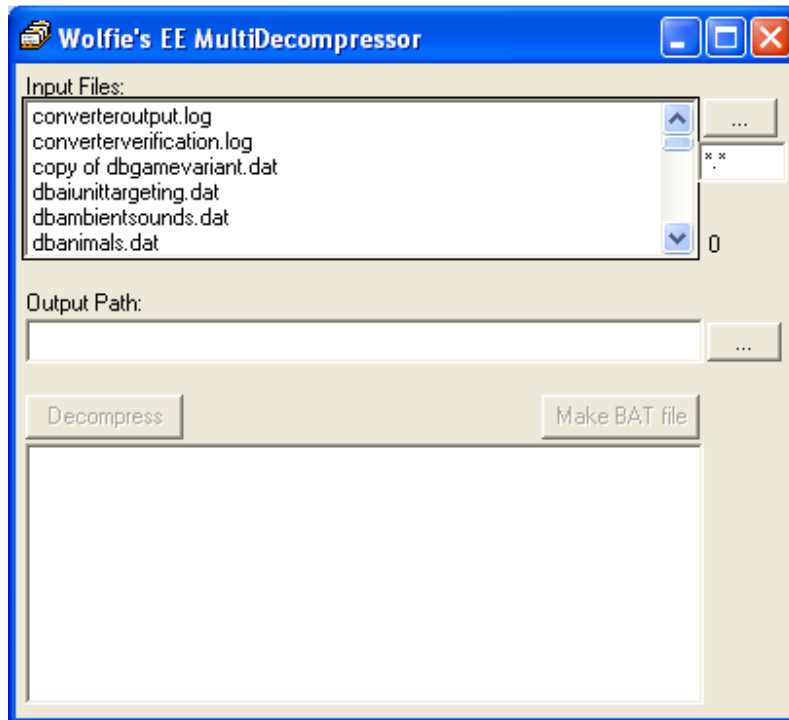

- 2- Decrypt files which were extracted by EE Studio using Wolfie's EE MultiDecompressor
Extract Wolfie's EE MultiDecompressor.zip archive .Open Wolfie's EE MultiDecompressor
Click Browse button as shown in figure below.

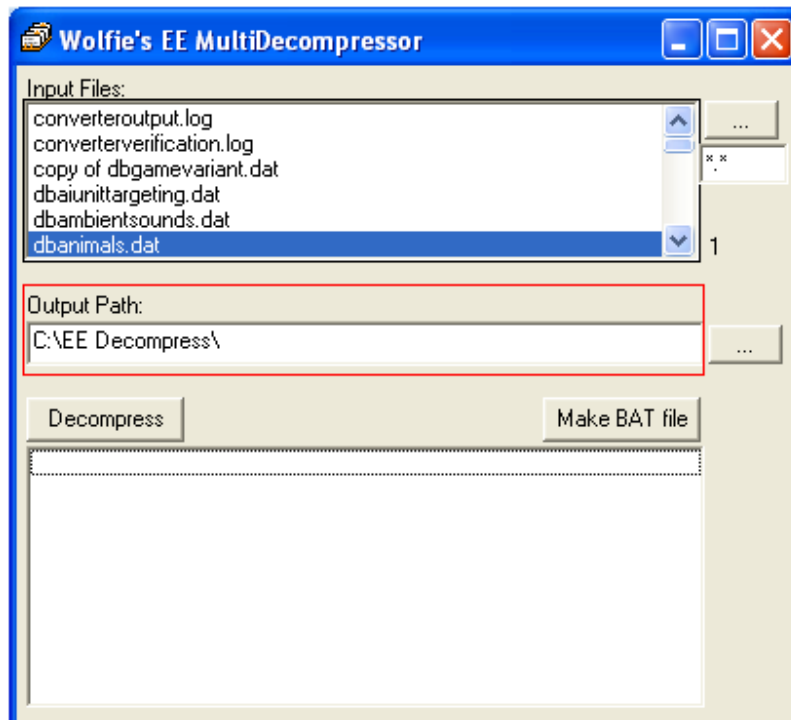

This gonna be shown_ go to our output directory which is located in c drive EE Extract folder then db folder and click ok

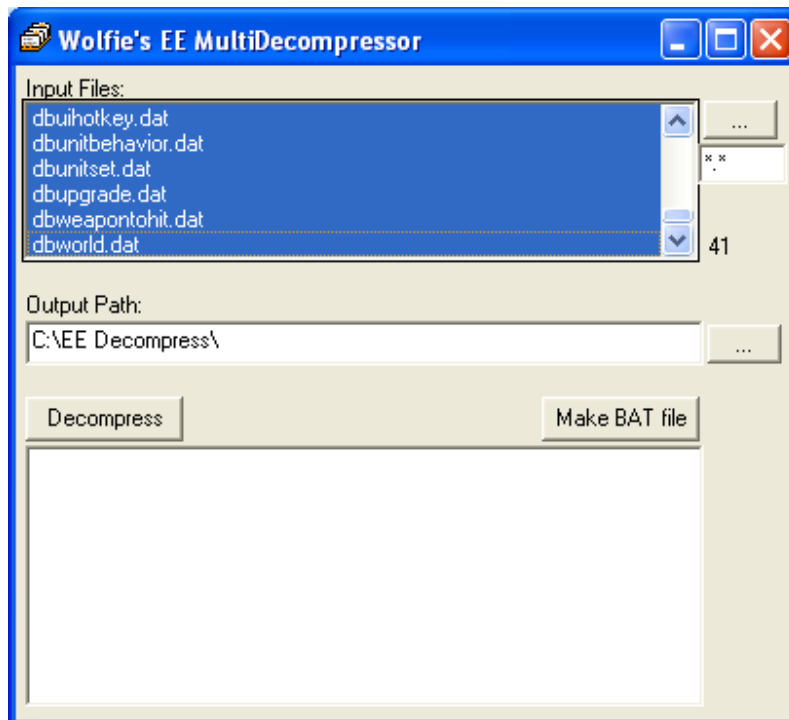

Now Files which were inside db folder shown dbanimals.dat, dbambient.dat and so on....

In Output path write this directory
C:\EE Decompress

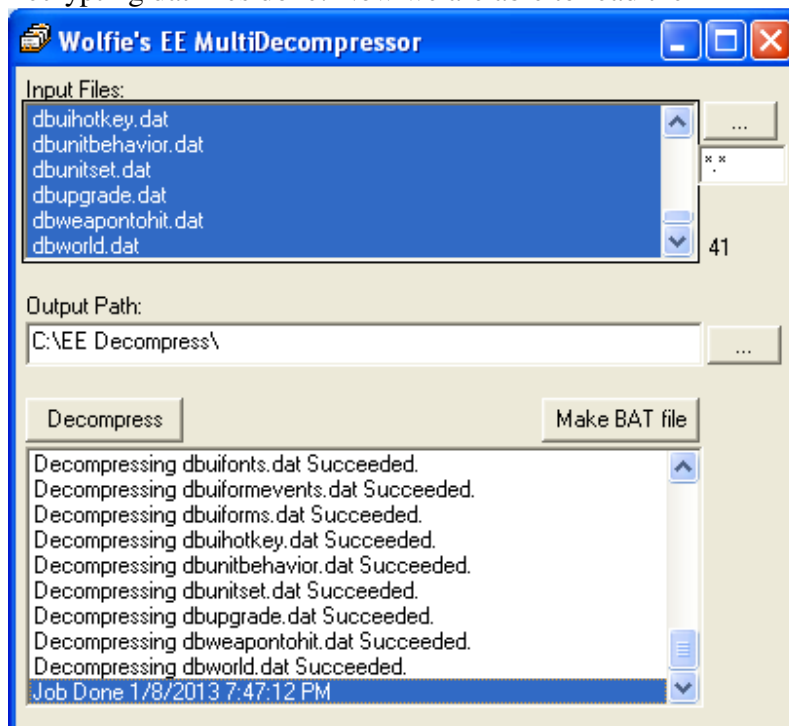

Select All files using Shift key, starting from first file until last file as shown below

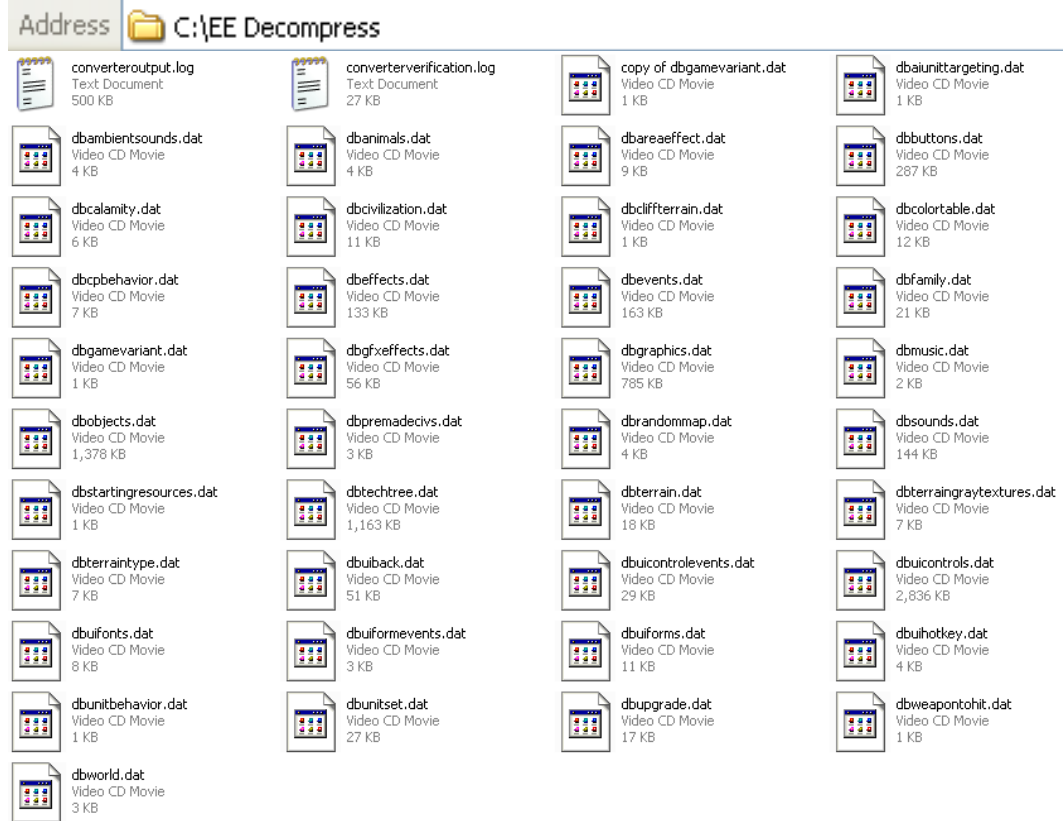

Click **Decompress Button**

Decrypting dat files done. Now we are able to read them

The Decompressed Files Available here as shown below

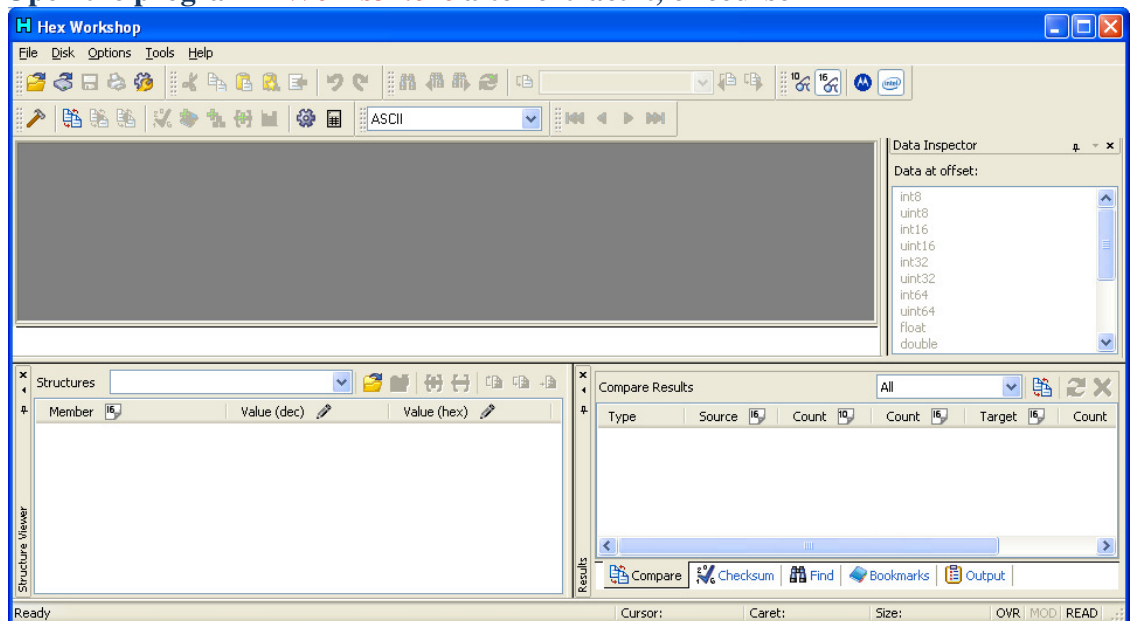

- 3- **Hexadecimals**.dat files which you decrypted them in step 2 located at **C:\EE Decompress**

That files can be opened using hex workshop program

Download and extract it

Open the program **HWorks32.exe** after extract it, of course

Hex Workshop [C:\VF Decompress\startingresources.dat]

File Edit Desk Options Tools Window Help

dbstartingresources.dat

This file holds for available Resources in game at start such As Standard high , Standard low, DeathMatch Tournament High and Tournament Low or ...

We gonna learn how to add New Resources and how to edit and what do we need for that?

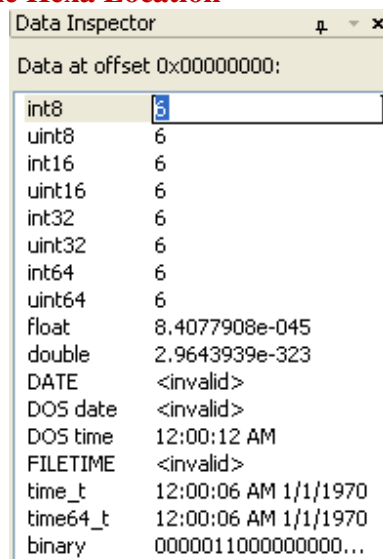

Analyze Region

06	00	00	00	00	00	00	00	00	00	01	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	00	00	00	FF	FF	FF	FF	FF	FF	FF	FF	FF
FF	FF	FF	FF	FF	FF	FF	FF	00	00	00	00	00	00	00	00	00	00	00	FF	FF
FF	FF	FF	FF	FF	FF	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	54	6F	75	72	6E	61	6D	65	6E	74	20	Tournamen

Text 7 lines of dbstartingresources.dat

Number of Resources + 1 =(5 Resources(deathmatch,tl(tournement low),sh,sl,td)) +1
If you add 1 new Resource you should increment this by 1

How to change Value? Just Click on the value shown here below and change it to whatever..After selecting the Hexa Location

55 6E 6C 69 6D 69 74 65 64 20 52 65 73 6F 75 72 63 65 73	Unlimited Resources
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 09 00 00 00

Now we need to add resource order_Since last resource in the file is deathmatch which has order 05 00 00 00 ,the new resource

55 6E 6C 69 6D 69 74 65 64 20 52 65 73 6F 75 72 63 65 73	Unlimited Resources
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 09 00 00 00 06 00 00 00

(Unlimited Resource) should have the order 06 00 00 00
As shown above

Now since we are adding New resource we need to increment the index of dbstarting resources by 1 how?

06 00 00 00 00 00 00 00 00 01 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
FF FF FF FF FF FF FF FF FF FF FF FF FF FF 00 00 00
00 00 00 00 00 00 00 00 00 FF FF FF FF FF FF FF 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 54 6E 75 72 6E 61 6D 65 6E 74 20 2D 20 4C 6F 77	...Tournament - Low

Go to the start of the file you will find 06 00 00 00 as shown in figure above

Means they are 5 Resources as explained before

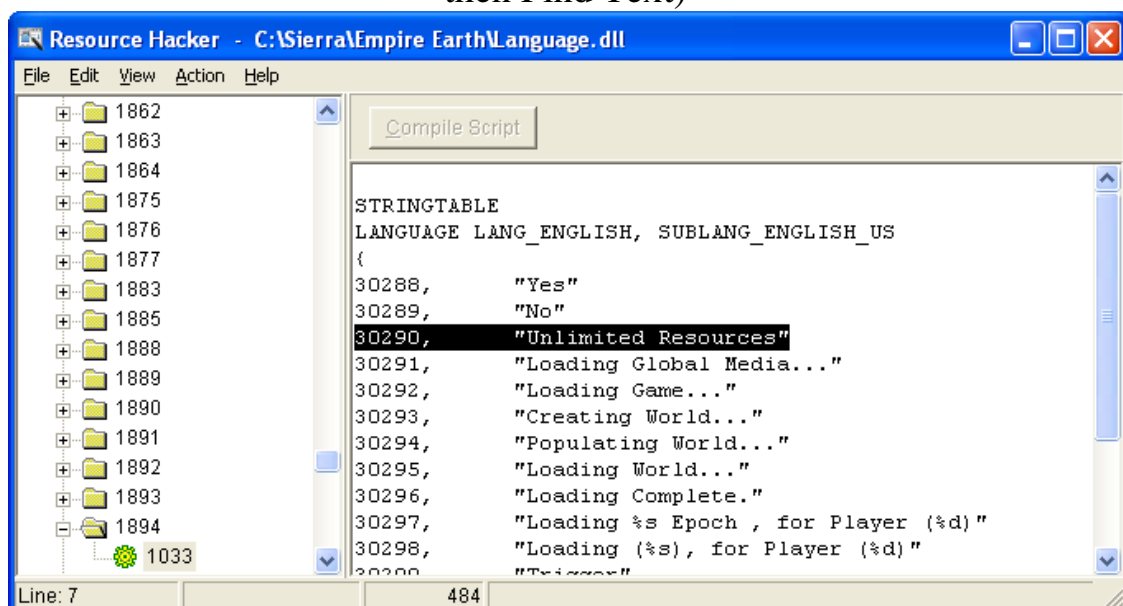

07 00 00 00 00 00 00 00 00 01 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
FF FF FF FF FF FF FF FF FF FF FF FF FF FF 00 00 00

Change that Value into 7 since we are adding new Resources with a total of 6 to be like this

55 6E 6C 69 6D 69 74 65 64 20 52 65 73 6F 75 72 63 65 73	Unlimited Resources
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 09 00 00 00 06 00 00 00 00

Now we are Here

We need to add language ID which can be added or obtain existed one
 Open resource hacker search for unlimited resources (Click on View
 then Find Text)

It is located at 30290 so we don't need to add since we have that
 Language.

In hex 52 76
In Decimal 30290

55 6E 6C 69 6D 69 74 65 64 20 52 65 73 6F 75 72 63 65 73	Unlimited Resources
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 09 00 00 00 06 00 00 00 52 76 00 00Rv..

So we need to add it
 So gonna added 52 76 00 00 which will look like

Now add Resource Amounts

We need to add Food Amount 4 Bytes, wood amount 4 bytes, Stone amount 4 bytes ,Gold amount 4 bytes, Iron amount 4 bytes

In Decimal 16771834

In hex FA EA FF 00

Will look like this

55 6E 6C 69 6D 69 74 65 64 20 52 65 73 6F 75 72 63 65 73	Unlimited Resources
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 09 00 00 00 06 00 00 00 52 76 00 00 FA EARv.....
FF 00 FA EA FF 00 FA EA FF 00 FA EA FF 00 FA EA FF 00

Save it and put it in data/db folder and try it

dbbuttons.dat

This file holds for available Buttons of the game

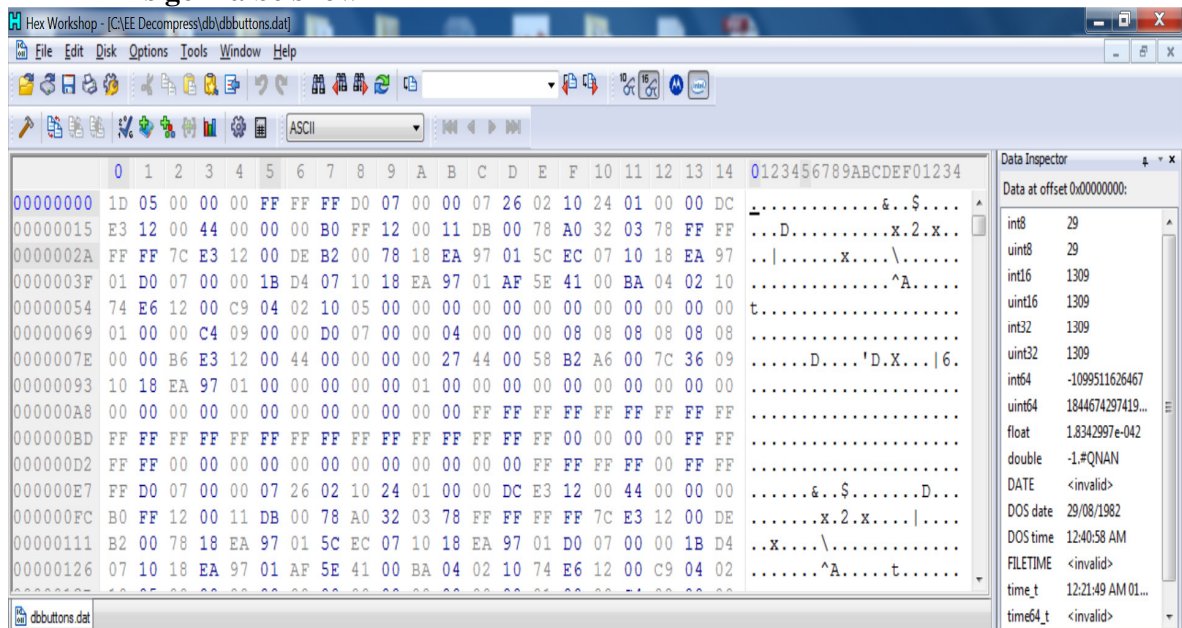

Let's start Analyze Second Db file which is **dbbuttons.dat**

Open Hex Workshop Program _ Browse into this folder

C:\EE Decompress \db

And choose dbbuttons.dat

This gonna be shown

We gonna learn how to add New Button and how to edit and what do we need for that?

00000000	1D	05	00	00	00	FF	FF	FF	D0	07	00	00	07	26	02	10	24	01	00	00	DC&..\$....
00000015	E3	12	00	44	00	00	00	B0	FF	12	00	11	DB	00	78	A0	32	03	78	FF	FF	...D.....x.2.x..
0000002A	FF	FF	7C	E3	12	00	DE	B2	00	78	18	EA	97	01	5C	EC	07	10	18	EA	97x....\.....

Index of DBButton_ Number of buttons in the File +1 ..1308 Buttons +1 with a Total of 1309 ..In Hex 1D 05 00 00

This Index Gonna Be found at the start of dbbutton.dat 2 Bytes=16 Bit

1D	05	00	00	Data at offset 0x00000000:
				int8 29
				uint8 29
				int16 1309
				uint16 1309
				int32 1309
				uint32 1309

The total number of Buttons is 1308 but always +1 for programming Purpose
If we add new Button means this gonna Be Incremented By 1 for each new Button

Lets Analyze Mech Zeus Button

FF	FF	FF	FF	4D	65	63	68	20	5A	65	75	73	00	00	00	00	00	00	00	00	00Mech Zeus.....

00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	74t
65	78	74	75	72	65	73	5C	62	75	74	5F	7A	75	65	73	5F	31	33	54	00	00	extures\but_zues_13T.
00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00
00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	00	E0	00	00	00	EA	00
00	00	00	00	00	00	00	00	00	00	05	00	00	00	FF	FF	FF	FF	4D	65	63	00Mec

Selected By Black is related All to Mech Zeus Button

Note: Whatever length of file name ,it will be no matter if it is in the range of 100 bytes

So Give it whatever let's say AF EB 00 00_shown below

Now add Button ID ,Last button ID in the file is 1308

In Decimal 1309

Don't Forget It should Be in Order of Button ID in the File!!

[illegible]

Add Button Position_We want it to be shown in 9 as example so would be like this

4A 69 6D 4B 69 73 20 4B 68 61 4E 00 00 00 00 00	JimKis KhaN.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 74 65 78 74 75 72 65 73 5C 62 75 74textures\but
5F 4A 69 6D 6B 69 73 00 00 00 00 00 00 00 00 00	_Jimkis.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 AF EB 00 00 1D 05 00 00
00 00 00 00 00 00 00 00 09 00 00 00 00 00 00

Finally End Your Button By FF FF FF FF as shown Below

4A 69 6D 4B 69 73 20 4B 68 61 4E 00 00 00 00 00	JimKis KhaN.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 74 65 78 74 75 72 65 73 5C 62 75 74textures\but
5F 4A 69 6D 6B 69 73 00 00 00 00 00 00 00 00 00	_Jimkis.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 AF EB 00 00 1D 05 00 00
00 00 00 00 00 00 00 00 09 00 00 00 FF FF FF FF

Since we are adding New Button We need to change Index of Dbbuttons.dat (Start Byte of The file) and Increment it By 1

00000000 1D 05 00 00 00 FF FF FF D0 07 00 00 07 26 02 10&..

From 1309 Decimal into 1310 Decimal

From 1D 05 00 00 into 1E 05 00 00

As shown below

00000000 1E 05 00 00 00 FF FF FF D0 07 00 00 07 26 02 10

dbgamevariant.dat

This file holds for available Game Variants Such as Tournament and Standard

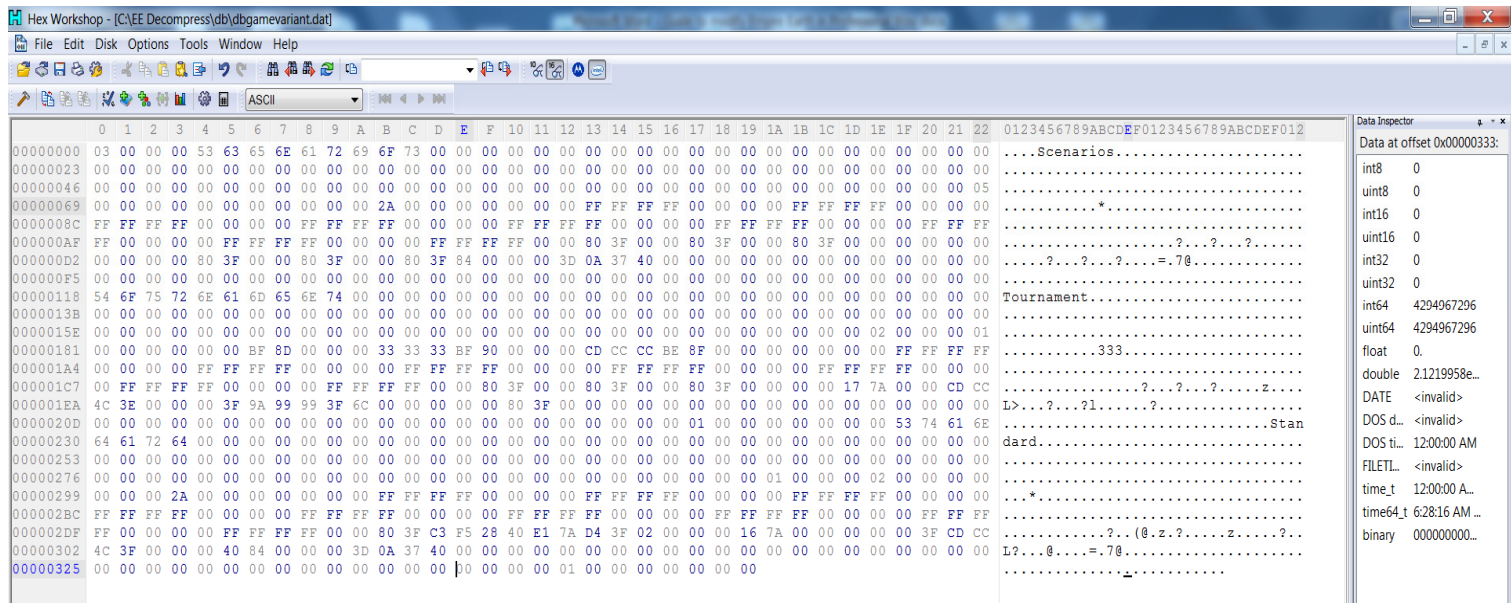

Let's start Analyze Second Db file which is **dbgamevariant.dat**

Open Hex Workshop Program _ Browse into this folder

C:\EE Decompress \db

And choose dbgamevariant.dat

This gonna be shown

Index of `dbggamevariant.dat`(first byte in the file) is shown below

```
03 00 00 00 53 63 65 6E 61 72 69 6F 73 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
```

It is 03 00 00 00 in Hex but in Decimal is also 3

Which means there are 2 game variants

So If we add new Game Variant We need to increment this by 1
 /-----\
 |

Lets Analyze Tournament Variant

Selected Hex Locations and Bytes Relates to Tournament Variant

	Gather Rate_How fast it is?! (Food+Gold+Iron+ Hunt + Wood only)		Enable or Disable_ 1 Enable whatever (2,3,4,5,...) Disable
	Language ID		
	Varient Name For your use only_Not showing in game_100 Bytes_100 hex locations		Wonders Cost
	Game ID_Is not problem as I Know_Put the value whatEver not used		
	Varient ID _Should Be in Order		
	Cost of Upgrades		

Wonders Cost	Hexadecimal
1050	6C 00 00 00
2100	84 00 00 00

Cost of Buildings

[illegible][illegible]

Now add Variant ID Since last Variant ID is 2 so this going to be 3

44 65 61 74 68 4D 61 74 63 68 20 20 20 20 20 20	DeathMatch
56 61 72 69 61 6E 74 00 00 00 00 00 00 00 00 00	Variant.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 06 00 00 00 03 00 00 00 00 00 00 00

Now we need to Increment the Index of dbgamevariant.dat (at the start of the file) by 1

03 00 00 00	53 63 65 6E 61 72 69 6F 73 00 00 00Scenarios...
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	2A 00 00 00 00 00 00 00 FF FF FF FF*

So it will be 04 00 00 00 as shown below

04 00 00 00	53 63 65 6E 61 72 69 6F 73 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00	2A 00 00 00 00 00 00 00 FF FF FF FF

**Now just copy The remaining for The new Variant from Tournemant
Copy as follows and add them to your Hexas**

00 00 00 BF 8D 00 00 00 33 33 33 BF333.
90 00 00 00 CD CC CC BE 8F 00 00 00 00 00 00 00
FF FF FF FF 00 00 00 00 FF FF FF FF 00 00 00 00
FF FF FF FF 00 00 00 00 FF FF FF FF 00 00 00 00
FF FF FF FF 00 00 80 3F 00 00 80 3F 00 00 80 3F?...?...?
00 00 00 00 17 7A 00 00 CD CC 4C 3E 00 00 00 3Fz....L>...?
9A 99 99 3F 6C 00 00 00 00 00 80 3F 00 00 00 00	...?1.....?....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 01 00 00 00 00 00 00 00 00 00 00 00

**Add it and change Language ID+ Cost of wonders + Gather Rate +
and Enable it**

**DeathMatch Language ID located at 7150 in Decimal
In Hex
EE 1B 00 00**

It will look like below

44 65 61 74 68 4D 61 74 63 68 20 20 20 20 20 20	DeathMatch
56 61 72 69 61 6E 74 00 00 00 00 00 00 00 00 00	Variant.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 06 00 00 00 03 00 00 00 00 00 00 BF
8D 00 00 00 33 33 33 BF 90 00 00 00 CD CC CC BE333.....
8F 00 00 00 00 00 00 00 FF FF FF FF 00 00 00 00
FF FF FF FF 00 00 00 00 FF FF FF FF 00 00 00 00
FF FF FF FF 00 00 00 00 FF FF FF FF 00 00 00 00
FF FF FF FF 00 00 00 00 FF FF FF FF 00 00 80 3F?
00 00 80 3F 00 00 80 3F 00 00 00 00 EE 1B 00 00	...?...?.....
CD CC 4C 3E 00 00 00 3F 9A 99 99 3F 6C 00 00 00	..L>...?...?l...
00 00 80 3F 00 00 00 00 00 00 00 00 00 00 00	...?.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 01 00 00
00 00 00 00

Now Change the Gather Rate and cost of upgrade it will look like this

44 65 61 74 68 4D 61 74 63 68 20 20 20 20 20 20	DeathMatch
56 61 72 69 61 6E 74 00 00 00 00 00 00 00 00 00	Variant.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 06 00 00 00 03 00 00 00 00 00 00 BF
8D 00 00 00 33 33 33 BF 90 00 00 00 CD CC CC BE333.....
8F 00 00 00 00 00 00 00 FF FF FF FF 00 00 00 00
FF FF FF FF 00 00 00 00 FF FF FF FF 00 00 00 00
FF FF FF FF 00 00 00 00 FF FF FF FF 00 00 00 00
FF FF FF FF 00 00 00 00 FF FF FF FF 00 00 80 3F?
00 00 40 3F 00 00 40 3F 00 00 00 00 EE 1B 00 00	..@?...@?.....
CD CC 4C 3E 00 00 00 3F 9A 99 99 3F 6C 00 00 00	..L>...?...?l...
00 00 80 3F 00 00 00 00 00 00 00 00 00 00 00	...?.....
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 01 00 00
00 00 00 00

**This gonna Increase Gather Rate nearly in double rate and more
And decrease the cost of upgrade nearly_ It is possible to control cost
more by changing the hexa location explained previously**

dbuihotkey.dat

This file holds for available Hotkeys can be used in the game

Let's start Analyze the Db file which is **dbuihotkey.dat**

Open Hex Workshop Program _ Browse into this folder

C:\EE Decompress \db

And choose **dbuihotkey.dat**

The Selected Hexas are related to Z hotkey!

Hotkey ID_It is In Order in the File
Game ID Hotkey_Is not important
Key name for your use only_ Not showing in game_100 bytes_100 hexa location
Hexas for Ending the hotkey hex Purpose_It tells the game that this is Hotkey..
I dont know what does this means for now! but maybe later i can get what use of this! Leading it to zero will not affect the game because hotkey will keep working..I did try it

Most thing Here is the Hotkey ID!!_We don't want Anything Else

This file holds for available Civilizations in the game

Let's start Analyze the Db file which is **dbcivilization.dat**

Open Hex Workshop Program _ Browse into this folder
C:\EE Decompress \db
And choose **dbcivilization.dat**

Selected Bytes Related to Infantry Swords Civilizations Which contains

Infantry - Sword

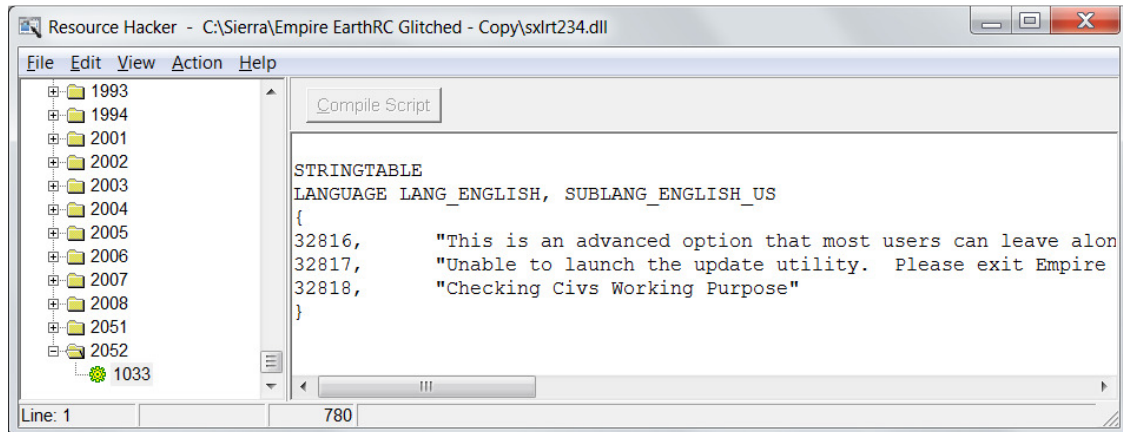

- 20% Armor
- 25% Attack
